

main.c

Output

```
1  #include <stdio.h>
2  int main() {
3      int n, rev = 0, rem;
4      printf("Enter a number: ");
5      scanf("%d", &n);
6      while (n != 0) {
7          rem = n % 10;
8          rev = rev * 10 + rem;
9          n /= 10;
10     }
11     printf("Reversed number = %d", rev);
12     return 0;
13 }
```

Run

main.c

Output

Enter a number: 54321

Reversed number = 12345
